AmaTerra (formerly Ecological Communications Corporation) is a small, minority-owned, and Historically Underutilized Business (HUB) and Disadvantaged Business Enterprise (DBE). We provide full cultural resource consulting services throughout all parts of Texas for compliance with the Antiquities Code of Texas, the National Historic Preservation Act (NHPA), and the National Environmental Policy Act (NEPA). Our services include historical research, historical building surveys and assessments, historic cemetery services, as well as archeological surveys, testing, and excavation. We offer geophysical remote sensing capabilities (magnetometer, ground-penetrating radar, etc.) as well as marine archeological remote sensing survey and hazard survey interpretation. We also offer biological services such as wetland delineations and threatened and endangered species studies. Our projects include roads, pipelines, transmission lines, reservoirs, oil and gas exploration, water treatment facilities, parks, airports, housing and urban developments, and studies for municipal, State, and Federal clients. We have received awards of excellence by the Texas Historical Commission and are proud of our reputation for excellent customer service.

**Apex TITAN, Inc.
Debra L. Beene, RPA

Cell (512) 769-3150

Email: dbeene@apexc.com

Apex is an environmental and engineering firm committed to mutually-beneficial land use. We are dedicated to protecting significant resources while enabling your growth and profitability. Our staff includes archaeologists, archival researchers, GIS specialists, biologists, and wetland ecologists that can guide you through the complex issues presented by the National Environmental Policy Act (NEPA), the Endangered Species Act, the Migratory Bird Treaty Act, the National Historic Preservation Act (NHPA), and other regulatory statutes including the Antiquities Code of Texas. Ms. Beene is a professional archeologist with more than 28 years of experience working in cultural resource management related to federal and state cultural resource regulations. This experience includes all levels of field investigation as well as fifteen years experience in providing regulatory oversight of state and federal preservation laws for the Texas Historical Commission/Texas State Historic Preservation Office. Ms. Beene has conducted archeological research throughout Texas and Oklahoma and in portions of Colorado, Kansas, Louisiana, Mississippi, New Mexico, Illinois, Ohio, Wyoming, South Carolina, and California. Ms. Beene has been responsible for coordinating and directing archeological field investigations, data collection, analysis, and writing reports. This work includes all levels of archeological investigation: desktop reviews, research designs, intensive and reconnaissance surveys, site evaluations, monitoring, and NRHP/SAL testing and mitigation. Whatever your goals are, we can help you understand the complexities of the regulatory environment, identify environmental constraints, evaluate avoidance, minimization, and permitting options, develop a timely, cost-effective strategy to achieve compliance, and navigate the permitting process.

Website: <http://car.utsa.edu/>

Founded in 1974, CAR has conducted all phases of archaeological projects for federal, state, and local agencies. We provide services to public and private sector clients that assist in the development and implementation of projects, including those required by legislation to go through the permitting process. Our areas of expertise include prehistoric Texas and the Southwest, with emphasis on South Texas. We also have extensive experience in archival and archaeological research on Historic Texas, especially with materials related to San Antonio and the missions. CAR is a Texas Historical Commission state-certified repository for archaeological collections and records, and we provide a full range of curation services for South Texas and beyond. CAR consists of a staff of approximately 30 professional archaeologists, curation and laboratory specialists, students, and support personnel. We have administered over 500 contracts and grants, the results of which are published in more than 500 academic and technical reports.

Goshawk is a Central Texas-based Environmental and Cultural Resources consulting firm founded in 2005. Our team has worked extensively in Texas and surrounding states for a diverse range of projects and clients. Our cultural resource team provides: Phase I, II, and III investigations; Integrated Cultural Resource Management Plans; Programmatic Agreements, Memoranda of Agreement, Memoranda of Understanding; Section 106 coordination with federal and state agencies; Tribal consultation facilitation services; and public outreach.

We place special emphasis on permit and compliance requirements and have extensive experience in coordination with local, state and federal review agencies. Our interdisciplinary staff is fully accredited and has experience with breadth of regulatory statutes and guidelines including: National Environmental Policy Act, US Army Corps of Engineers Section 404 and Individual Permits, Section 106 National Historic Preservation Act, Texas Antiquities Code, TCEQ Waste Water Discharge Permits, Federal Energy Regulatory Commission and TxDOT coordination.

Goshawk works with you to develop practicable, cost-effective solutions that get the job done in a timely manner. Our responsiveness and caring ensure that you get the best service possible.

We also provide comprehensive natural resource services and integrate the two service lines when needed to address regulatory issues. Our GIS service line allows us to effectively document, illustrate, and manage data for all your projects.

Integrated Environmental Solutions, LLC (IES) is a small, woman-owned business certified as HUB and D/WBE. IES is a full service environmental and cultural resources consulting firm with headquarters in McKinney, Texas. IES' office is within an hour from any part of the Dallas/Fort Worth Metroplex and can quickly mobilize for any project within Texas and Oklahoma. For over 10 years, IES has worked under contract and in coordination with numerous political subdivisions, federal agencies, and private sector entities to provide assistance in navigating the obstacles surrounding cultural resources requirements under Section 404 of the Clean Water Act (CWA), National Environmental Policy Act (NEPA), Sections 106 and 110 of the National Historic Preservation Act (NHPA), and Antiquities Code of Texas (ACT). While the cultural resources team specializes in rapidly conducting archeological surveys and report preparation for clients needing to maintain compliance with state and federal cultural resource regulations throughout Texas and Oklahoma, IES is also capable of performing more intensive

testing and data recovery level investigations. IES also has proven experience in documenting, assessing, and resolving adverse effects regarding historic-aged architectural resources. The IES team has an expert Geographic Information Systems (GIS) staff capable of compiling and manipulating spatial data to produce detailed cultural resources probability models and professional-grade mapping. Through a detailed understanding of cultural resources regulations and a developed rapport with state and federal agencies, IES has the expertise needed to effectively navigate the regulatory compliance world.

Macrobotanical Analysis

Moore Archeological Consulting, Inc. (MAC) has operated as a Cultural Resource Management (CRM) firm based in Houston, Texas, since its founding by Roger Moore, Ph.D. in 1982. Under the continued leadership of Dr. Moore, MAC combines extensive experience with a service-oriented approach to the problems and objectives of CRM. We are accustomed to working as

members of planning and design teams, and we understand the conditions for the successful completion of Federal and State archeological compliance projects. The firm has well-established working relationship with Federal and State regulatory agencies and can provide the necessary range of cultural resource services to satisfy Section 106, Texas Antiquities Code, Federal Environmental Assessment and Impact Statements, and US Army Corps of Engineers Permit requirements for most projects. These services encompass archeological survey, site testing and mitigation, construction monitoring, remote sensing, historical documentary research, architectural and structures investigations, GIS mapping, geomorphology, and maritime archeology. The firm also has expertise in the specialized subdisciplines of Conflict Archeology and Urban Archeology. MAC has conducted more than 600 major archeological projects and numerous desk-based investigations. These projects were conducted for an array of endeavors including highway construction, mass transit, park planning and development, energy projects, oil spills, flood control, real estate development, cemeteries, and industrial development among others.

Prewitt and Associates provides cultural resources services throughout Texas and adjoining states. Based in Austin, we are a small business founded in 1979. Our staff offers expertise in all phases of prehistoric and historic archeology (background studies, survey, testing, data recovery, and construction monitoring), historic cemetery investigations, geomorphology, archival and oral history research, historical resources surveys, HABS/HAER documentation, National Register of Historic Places and State Antiquities Landmark nominations, Native American tribal consultation, descendant community and public outreach, and historic preservation planning. Our clients include federal and state agencies, local governments, engineering and environmental firms, private industry (mining, oil and gas, solar, and wind power interests, as well as residential and commercial developers), neighborhood groups, and individuals. We regularly assist our clients in understanding cultural resources regulations and navigating the compliance processes required by Section 106 of the National Historic Preservation Act, the Antiquities Code of Texas, and the National Environmental Policy Act. We provide the highest level of professional expertise, producing quality work on time and within budget. As recognition of this, the firm or its employees have received multiple awards from the Texas Historical Commission, the American Cultural Resources Association, the Council of Texas Archeologists, and the Texas Oral History Association.

WSA is celebrating its 24th year serving state, federal, municipal, tribal, and all types of private clients in meeting numerous state and National Historic Preservation Act Section 106 cultural resources/archaeological requirements in a conservative and professional manner. We currently have five offices serving five major regions of the United States. Dr. James Karbula serves as Regional Project Director of the Southern Region working from our new location near the downtown area of historic Round Rock, Texas. Dr. Karbula received his Ph.D. from UT Austin and has more than 16 years experience directing CRM archaeology projects in Texas and surrounding states. Current award winning projects include the mitigation of an energy development facility on the Spindletop Oil Field National Historic Landmark in Beaumont,

Texas. It is our conservative yet professional approach to cultural resource management that allows us to stand apart from other CRM firms – our corporate mentality is that Your Project is Our Priority. We understand that moving your job to construction or obtaining necessary clearances is our sole duty; the fact that we do quality archaeological assessment and documentation, winning awards and agency and client kudos, is an indication of the dedication of our staff to make WSA one of the most competent and respected cultural resources consulting firms in the U.S.
